We offer a dynamic, positive and highly effective teaching and learning program that fosters the development of all individuals. We set high expectations for students and provide all learners with a warm, secure and nurturing environment.

In striving to develop students we focus on academic excellence, social connectedness and emotional strength and resiliency.

A major aspect of this development is building quality relationships within the school.

This incorporates relationships with students, between students and also fostering positive and effective links between home and school.

Our school is a place for the whole of our community.

Watsonia Heights has a strong focus on embedding the core foundational skills to empower the learners and leaders of tomorrow.

Building strength in *literacy, numeracy and fostering a passion for learning through an engaging, diverse, challenging and open ended curriculum.*

Our strong whole school **wellbeing** focus provides children with many opportunities to Strive!

In maintaining our high expectations, we continue to build students' capacity to embrace the 21st Century skills of **Collaboration, Creativity, Communication and Critical thinking.**

WHPS is a great place for everyone to learn and have fun!

Moving into Prep and making the transition enjoyable is of vital importance. You know your child's needs the best and experiencing the school in operation will assist you in finding the right fit for your child. Selecting an appropriate school for your child can be a daunting task. I urge you to take the time to visit and discuss your child's needs with us.

Contact Principal Michael Kent to discuss your child's transition and arrange a tour.
